WEATHER

WEATHER SYNOPSIS BY REGION:

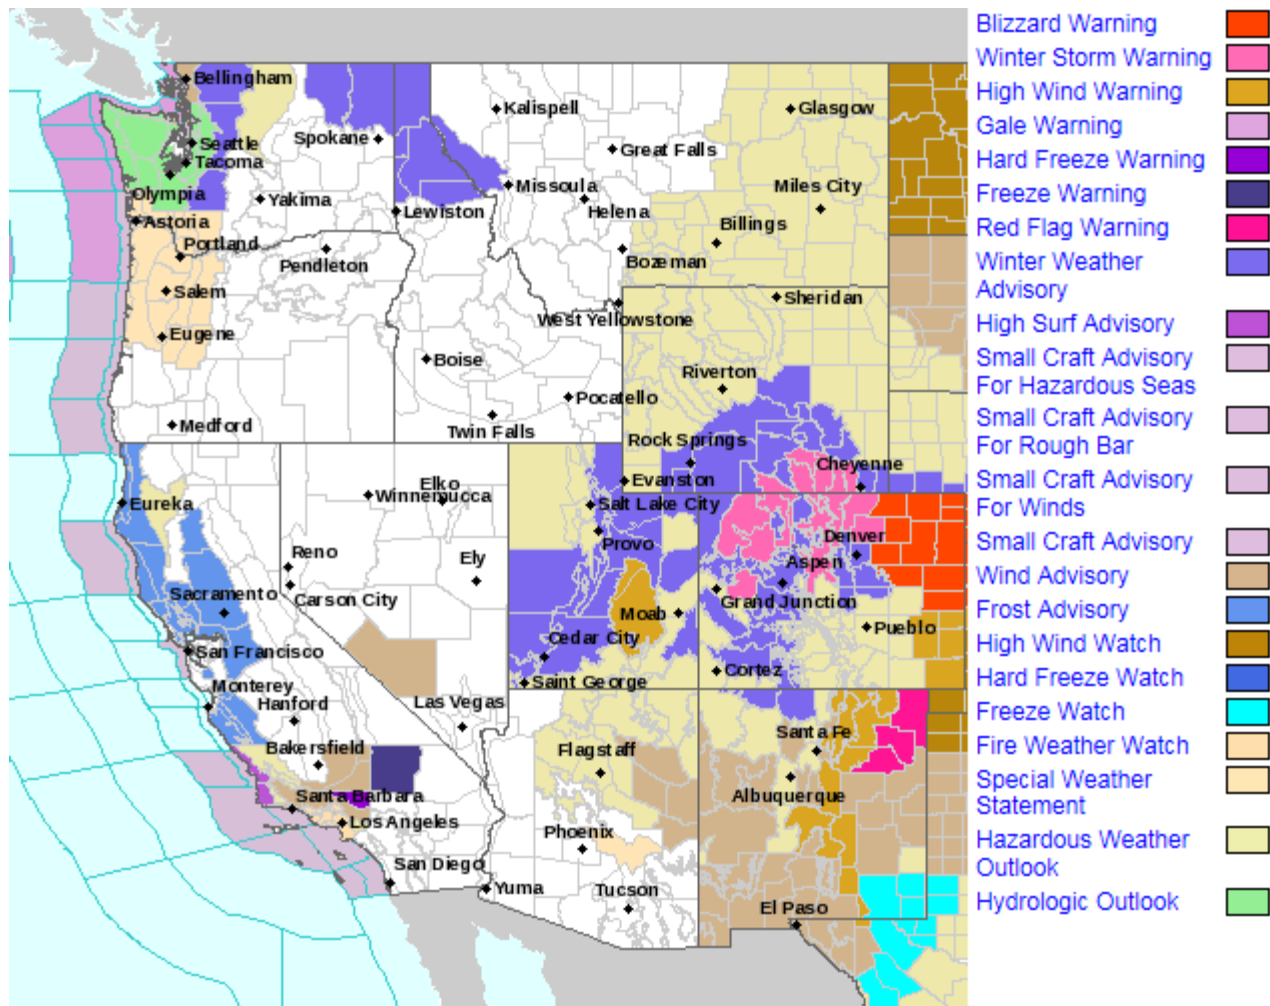

NORTHERN CALIFORNIA

The remnants of the weather system that moved through the region these past few days will be lingering over the greater Lake Tahoe area with perhaps a few snow showers this morning, otherwise mostly sunny conditions are expected across Northern California today. A weakening weather system will move into our northern areas Wednesday with a chance of showers for areas near the Oregon border and some cloudiness over the mountains elsewhere. Friday and Saturday higher pressure over Northern California will bring in mild-for-the-season conditions under mostly clear to partly cloudy skies. A stronger, moist weather system is now expected to move ashore and inland Sunday with more rain or snow for all areas. Although drier conditions seem most likely Monday, that probably won't last long as another weather system may arrive next Tuesday into Wednesday. The warmest inland valley areas will be in the mid and upper 60s later this week on the warmest days. Some gusty southerly winds will develop Saturday night and Sunday, particularly over the higher elevations where wind gusts could reach the 45 mph range.

SOUTHERN CALIFORNIA

A departing storm system will set the stage for a prolonged period of breezy conditions across much of Southern California. The storm deposited significant rainfall over the northern half of the state. In general, Monterey and Mariposa Counties and northward received over an inch of precipitation with measurable rain falling as far south as San Luis Obispo and Fresno Counties. Additional light precipitation will be possible on the north slopes of the Angeles and San Bernardino and areas near the Grapevine throughout the day. The rest of the district will see mostly sunny, but cool weather continuing with highs around 5 degrees below normal. North winds of 15-25 mph with gusts to 40 mph will be possible along the I-5 Corridor and the Cajon Pass through the day with gusts to 30 mph in adjacent areas of the San Fernando and San Bernardino Valleys. Wednesday through Saturday, gradients will turn offshore, leading to a prolonged period of east and northeast winds. The winds, while not expected to be overly strong, will last potentially up to 72 or 96 hours. This protracted period of sunny, warm and dry weather will lead to ideal drying conditions across Southern California into the weekend. At this time, the strongest winds look to occur Thursday night into Friday morning and the Santa Ana Wildfire Threat Index indicates a marginal risk of large fires over Ventura and Los Angeles Counties during that time. Wind gusts to 35-45 mph may be possible in those areas, especially early Friday morning. A weak trough moving into the Great Basin may induce additional warming to the coastal and valleys of Southern California and highs of 80-85 will be possible Thursday through Saturday. Minimum Relative Humidity will likely reach the single digits during the afternoon Thursday with poor recovery each night Wednesday through Friday. Onshore flow will likely bring cooler and more humid back to the region Sunday. Rain will be possible across the northern part of the state next Sunday and Monday, but no precipitation is expected across Southern California during the next 7-10 days.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every other Monday at 1100 hours.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

Local Emergency Proclamations:

A total of 62 local Emergency Proclamations have been received to date from city, county, and tribal governments, as well as special districts:

- 28 Counties: Butte, Colusa, El Dorado, Fresno, Glenn, Inyo, Humboldt, Kern, Kings, Lake, Madera, Mariposa, Merced, Modoc, Plumas, San Bernardino, San Joaquin, San Luis Obispo, Santa Barbara, Shasta, Siskiyou, Sonoma, Stanislaus, Sutter, Trinity, Tulare, Tuolumne, and Yuba.
- 13 Cities: City of Live Oak (Sutter County), City of Lodi (San Joaquin County), City of Manteca (San Joaquin County), City of Montague (Siskiyou County), City of Porterville (Tulare County), City of Portola (Plumas County), City of Ripon (San Joaquin County), City of San Juan Bautista (San Benito County), City of Santa Barbara (Santa Barbara County), City of Rancho Cucamonga (San Bernardino County) and City of West Sacramento (Yolo County), City of Willits (Mendocino County), and City of Fort Bragg (Mendocino County).
